

CLAIMS

1. A device (1) for supplying moisture into the interior of a laundry drier, wherein the device (1) comprises a receiving area (3) for receiving liquid and a liquid-impermeable sleeve (2) surrounding this receiving area (3) which has at least one outlet opening for dispensing moisture, characterised in that the sleeve (2) is heat-permeable.
2. The device according to claim 1, characterised in that the device (1) has at least one connecting means for connection to the drum of the laundry drier.
3. The device according to any one of claims 1 or 2, characterised in that the device (1) is suitable for receiving water.
4. The device according to any one of claims 1 to 3, characterised in that the at least one outlet opening comprises pores in the material of the sleeve (2).
5. The device according to any one of claims 1 to 4, characterised in that the sleeve (2) is made of a flexible material.
6. The device according to claim 4 or 5, characterised in that the sleeve (2) consists of a membrane, especially a membrane semipermeable for moisture.
7. The device according to any one of claims 1 to 6, characterised in that the device (1) in the sleeve (2) further comprises a closeable filling opening

(21) for bringing liquid into the receiving area (3).

8. The device according to any one of claims 1 to 7, characterised in that a carrier (31) for liquids is provided in the receiving area (3).
9. The device according to claim 8, characterised in that the carrier (31) is a sponge-like material.
10. The use of the device according to any one of claims 1 to 9 for removing odours from textiles in a laundry drier.
11. A method for supplying moisture into the interior of a laundry drier, characterised in that a device (1) which contains liquids, is inserted in the interior of the laundry drier, heat is produced by means of the heating device of the laundry drier, this heat brings the liquid in the device (1) to vaporise and the moisture thereby obtained is dispensed via at least one outlet opening for moisture in the device (1) onto the interior of the drier.
